

Data and ERP Specialist

We seek an ERP Data Architect to:

- assist in ensuring design delivers quality and value to the business
- advise on all data aspects of a major ERP project (storage, consistency, security, transfer, etc.)
- evaluate concepts and proposals of the systems integrator(s) and delivery partner(s) to ensure proposed solutions represent best value for, and are appropriate to, the client's needs and environment
- propose high level technical solutions and architectures to meet client needs
- engage with business areas within the client's organisation to understand and communicate their needs and requirements

This is a large, enterprise ERP/SAP program with a complicated, blended internal and contracted team, in a challenging environment. As always for us, time is short, and the program is not smooth. Why else would they want us?

The successful applicant will possess the knowledge to understand problems from a technical point of view, while possessing the strategic vision to understand the organisational implications of issues and solutions, and the pragmatic coordination skills to marshal resources and a broad stakeholder group to deliver effective outcomes.

They will also match many of the attributes sought of our management consultants. Particularly culture, behaviour, and attitude.

Apply with your CV and a covering letter. Explain why you fit, what you bring to the business, and to our client. You will initially meet with a senior member of our team so that you may understand us, our values, and our principles. You will then meet others in our team so that we may understand you.

If you think you are for us, and we are for you, we encourage you to apply.

Position Details

- Canberra based client.
- You will require a security clearance and therefore must be an Australian Citizen and have no impediments to achieving that clearance. You should state this explicitly in your application.
- You may be required to travel.
- You will be required to operate in a blended work environment – part home, part office and part client site.
- Flexible work arrangements are offered, bounded only by your ability to participate and deliver effectively.
- Permanent engagements are preferred but part-time, casual or contracted employment arrangements can be considered.
- Salary will be negotiated based on your experience and abilities.

If this sounds like you, apply now. Who knows where that adventure will lead – for both of us?
